

Natural Language Processing at Facebook Research

Facebook's mission is to give people the power to build community and bring the world closer together. Through our family of apps and services, we're building a different kind of company that connects billions of people around the world, gives them ways to share what matters most to them, and helps bring people closer together. Our global teams are constantly iterating, solving problems, and working together to empower people around the world to build community and connect in meaningful ways. Together, we can help people build stronger communities — we're just getting started.

Facebook is seeking Research Scientists, Research Engineers, Software Engineers and Interns to join our Natural Language Processing teams. Research areas include (but are not limited to):

Automatic Speech Recognition, Deeping Learning, Information Extraction, Language / Speech Processing, Natural Language Understanding, Machine Translation, Text / Parsing
